Prepare for a career in advanced technology and design that is transforming the way we light the world.

The M.S. in Lighting degree program at the Lighting Research Center at Rensselaer Polytechnic Institute is a nine-month multidisciplinary experience focusing on technology, design, human factors, and applications. Students work alongside world-class faculty experts in architecture, engineering, design, and bioscience, including the emerging fields of light & health and horticultural lighting.

Upon graduation, students have the opportunity to participate in a paid, post-graduation, EXTERNSHIP option for three months or more at a leading lighting manufacturer, design firm, or government organization.

The Lighting Research Center at Rensselaer Polytechnic Institute is the world’s leading center for lighting research and education. In 1990, the LRC became the first university research center to offer graduate degrees in lighting and today, offers a M.S. in lighting and a Ph.D. to educate future leaders in lighting. With more than 35 faculty and staff working closely with 15 select graduate students, and a 30,000 ft² laboratory space, the LRC is the largest university-based lighting research and education organization in the world.
