

## LRC MEMBERSHIP

### *Mission*

Since its inception in 1988, the Lighting Research Center (LRC) at Rensselaer Polytechnic Institute has been dedicated to making a difference. Our mission is to advance the effective use of light for society and the environment. The LRC conducts research in light and human health, transportation lighting and safety, lighting systems, energy efficiency, and plant health. All of our accomplishments have been achieved through collaborations with our Partners, Alliances, and research sponsors. As we move forward to new areas of research and applications of light, we seek to continue and enhance our collaborative legacy through a new category of collaborators called **LRC Members**.

### *Membership Benefits*

The main advantage of being an **LRC Member** is the opportunity to support the LRC mission, and at the same time to promote your organization. LRC Member logos are prominently featured on the LRC website, and included on a large print banner displayed at our research lab in a high-traffic location visible to all students, tour groups and event participants. Each Member organization can send up to five (5) participants, at no extra charge, to the LRC Summit, held each autumn in Troy, New York. The Summit aims to inspire discussion and shape the future of lighting, where the industry plays a strategic, recognized role in benefiting society and the environment — from improving human health to enhancing food production to managing clean energy in the new electric grid.

LRC Summit participants will hear visionaries discuss how lighting can benefit society and the environment, engage with peers from multiple stakeholder organizations, and help shape the future of lighting. At the Summit, LRC Members also have the opportunity to schedule private sidebars to discuss research and education opportunities with LRC leadership, including Drs. Mariana Figueiro, Mark Rea and Nadarajah Narendran.

The Summit includes inspiring keynotes, technical presentations, and tours of the LRC facilities. There are several networking opportunities throughout and an interactive dinner for LRC Partners, Alliances, and Members. The Summit includes a half-day workshop where the future of lighting education, research, and public outreach will be

discussed. The event ends with opportunities to interact one-on-one with LRC faculty, staff, and students.

### ***Become an LRC Member***

LRC Members contribute an annual subscription fee of **US\$5,000** and will receive the benefits outlined above. A commitment of more than one year receives a special discount.

<b>For the Member</b>	<b>For Rensselaer Polytechnic Institute</b>
Organization	Lighting Research Center
Address	21 Union Street, Troy, NY 12180
