

LIVE! from the LRC

Internet Teleconference Seminar Series

LIVE! from the LRC is an Internet-based seminar series offered by the Lighting Research Center. *LIVE!* from the LRC brings lighting experts to your office to provide the latest information on topics important to you and your business. The seminars allow you to have your questions answered by the leading authorities in lighting today. A telephone and an Internet-connected computer are the only equipment needed to take advantage of these informative seminars.

Earn CEUs

Participants earn two continuing education units (CEUs) accepted by the American Institute of Architects (AIA), the National Council on Qualification for the Lighting Professions (NCQLP), and other professional organizations.

Who should participate?

These seminars are designed to meet the needs of:

- Architects, engineers, and other lighting specifiers
- Facility managers and administrators
- Building owners and developers
- Energy service professionals
- Other professionals interested in gaining a better understanding of light and lighting

Topics include

- The Truth about Outdoor Lighting
- Solid-State Lighting
- Truths and Myths in Lighting: Lessons from Research
- Energy-Efficient Lighting: What's New
- Daylighting Techniques: What Works?
- Light and Health
- Advanced Seminar on Outdoor Lighting
- ...and others!

LRC expert Andrew Bierman leads an on-line session about lighting controls.

It's easy to participate
